xodiac

# Talk map

In our fast-paced world  
customers demand instant  
gratification

# Moving towards value delivery

1990's and before

1990 to 2020

2020 and beyond

Driving  
efficiency

Invest in technology  
capabilities

Drive immediate  
customer value

# Tools accelerate your Value Delivery

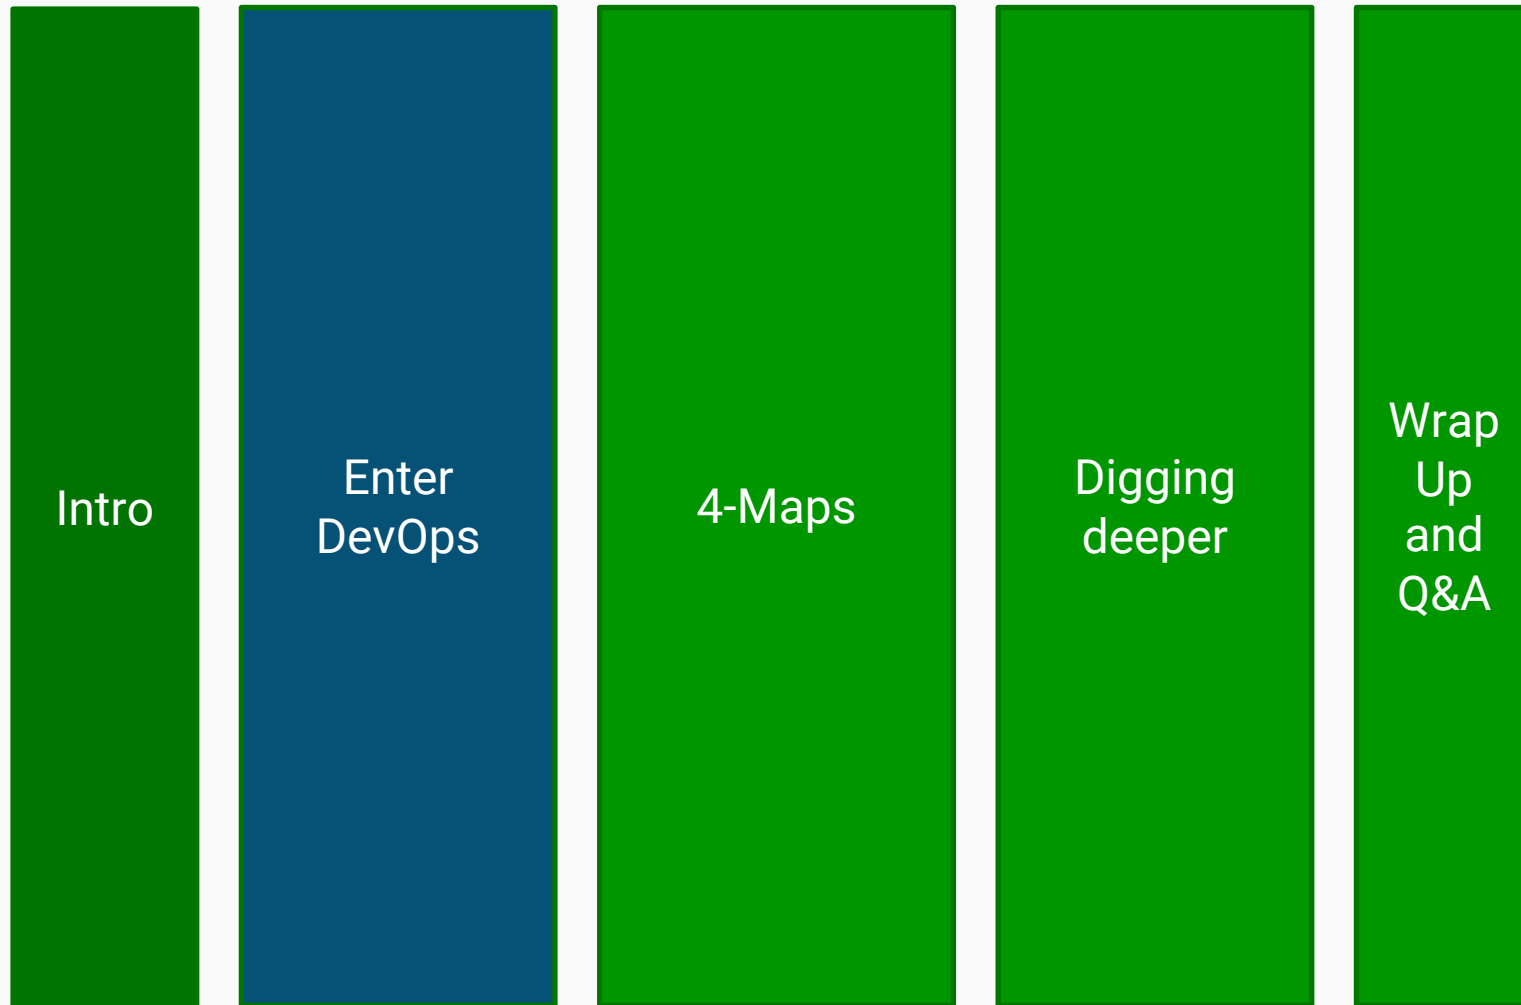

# Efforts Fail From Lack of Clarity, Not Tools

- Micromanagement
- Lack of Capability
- DevOps Team Silos
- Not Taking a Holistic Approach
- Doing Without Learning
- Lack of Shared Ownership
- Broken-Window Syndrome
- Fear of Failure
- Lack of Psychological Safety
- Lack of Valuable Measurement
- Lack of Vision
- Lack of Visibility
- Unspoken Disagreements
- Failure to Scale Pilots
- Unrealistic Expectations
- Overlooking Organizational Change
- Overemphasis on Velocity
- Automation Without Value
- Ineffective Measurement
- Ignoring Existing Process
- Ignoring Lean and Agile Principles
- Imbalanced Top-Down/Bottom-Up Approach
- Neglecting Stakeholders Beyond Dev / Ops
- Lack of Incentive and Governance Adaptation

# Talk map

“<sup>!!!</sup> People, processes and tools working together  
to enable rapid and continuous delivery of  
value to customers.”

- A bunch of people

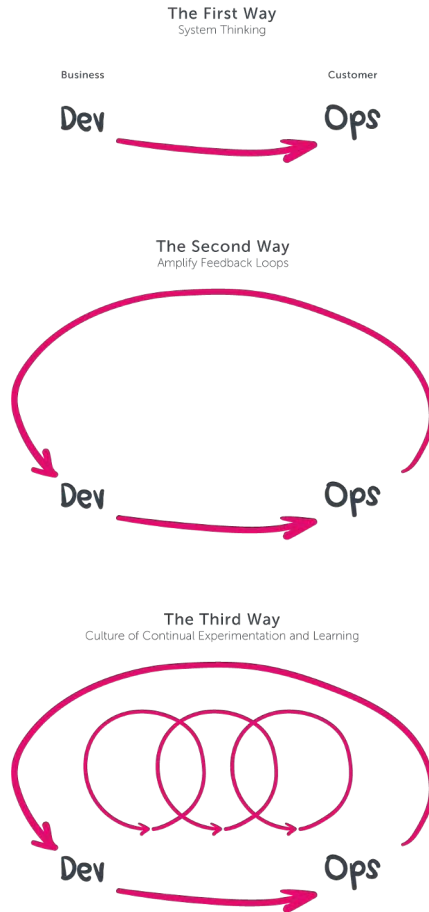

# Introducing change

“This year, I resolve to stay away from unnecessary risks.”

# 3 Ways and 5 Ideals!

## The Five Ideals

THE FIRST IDEAL: Locality and Simplicity

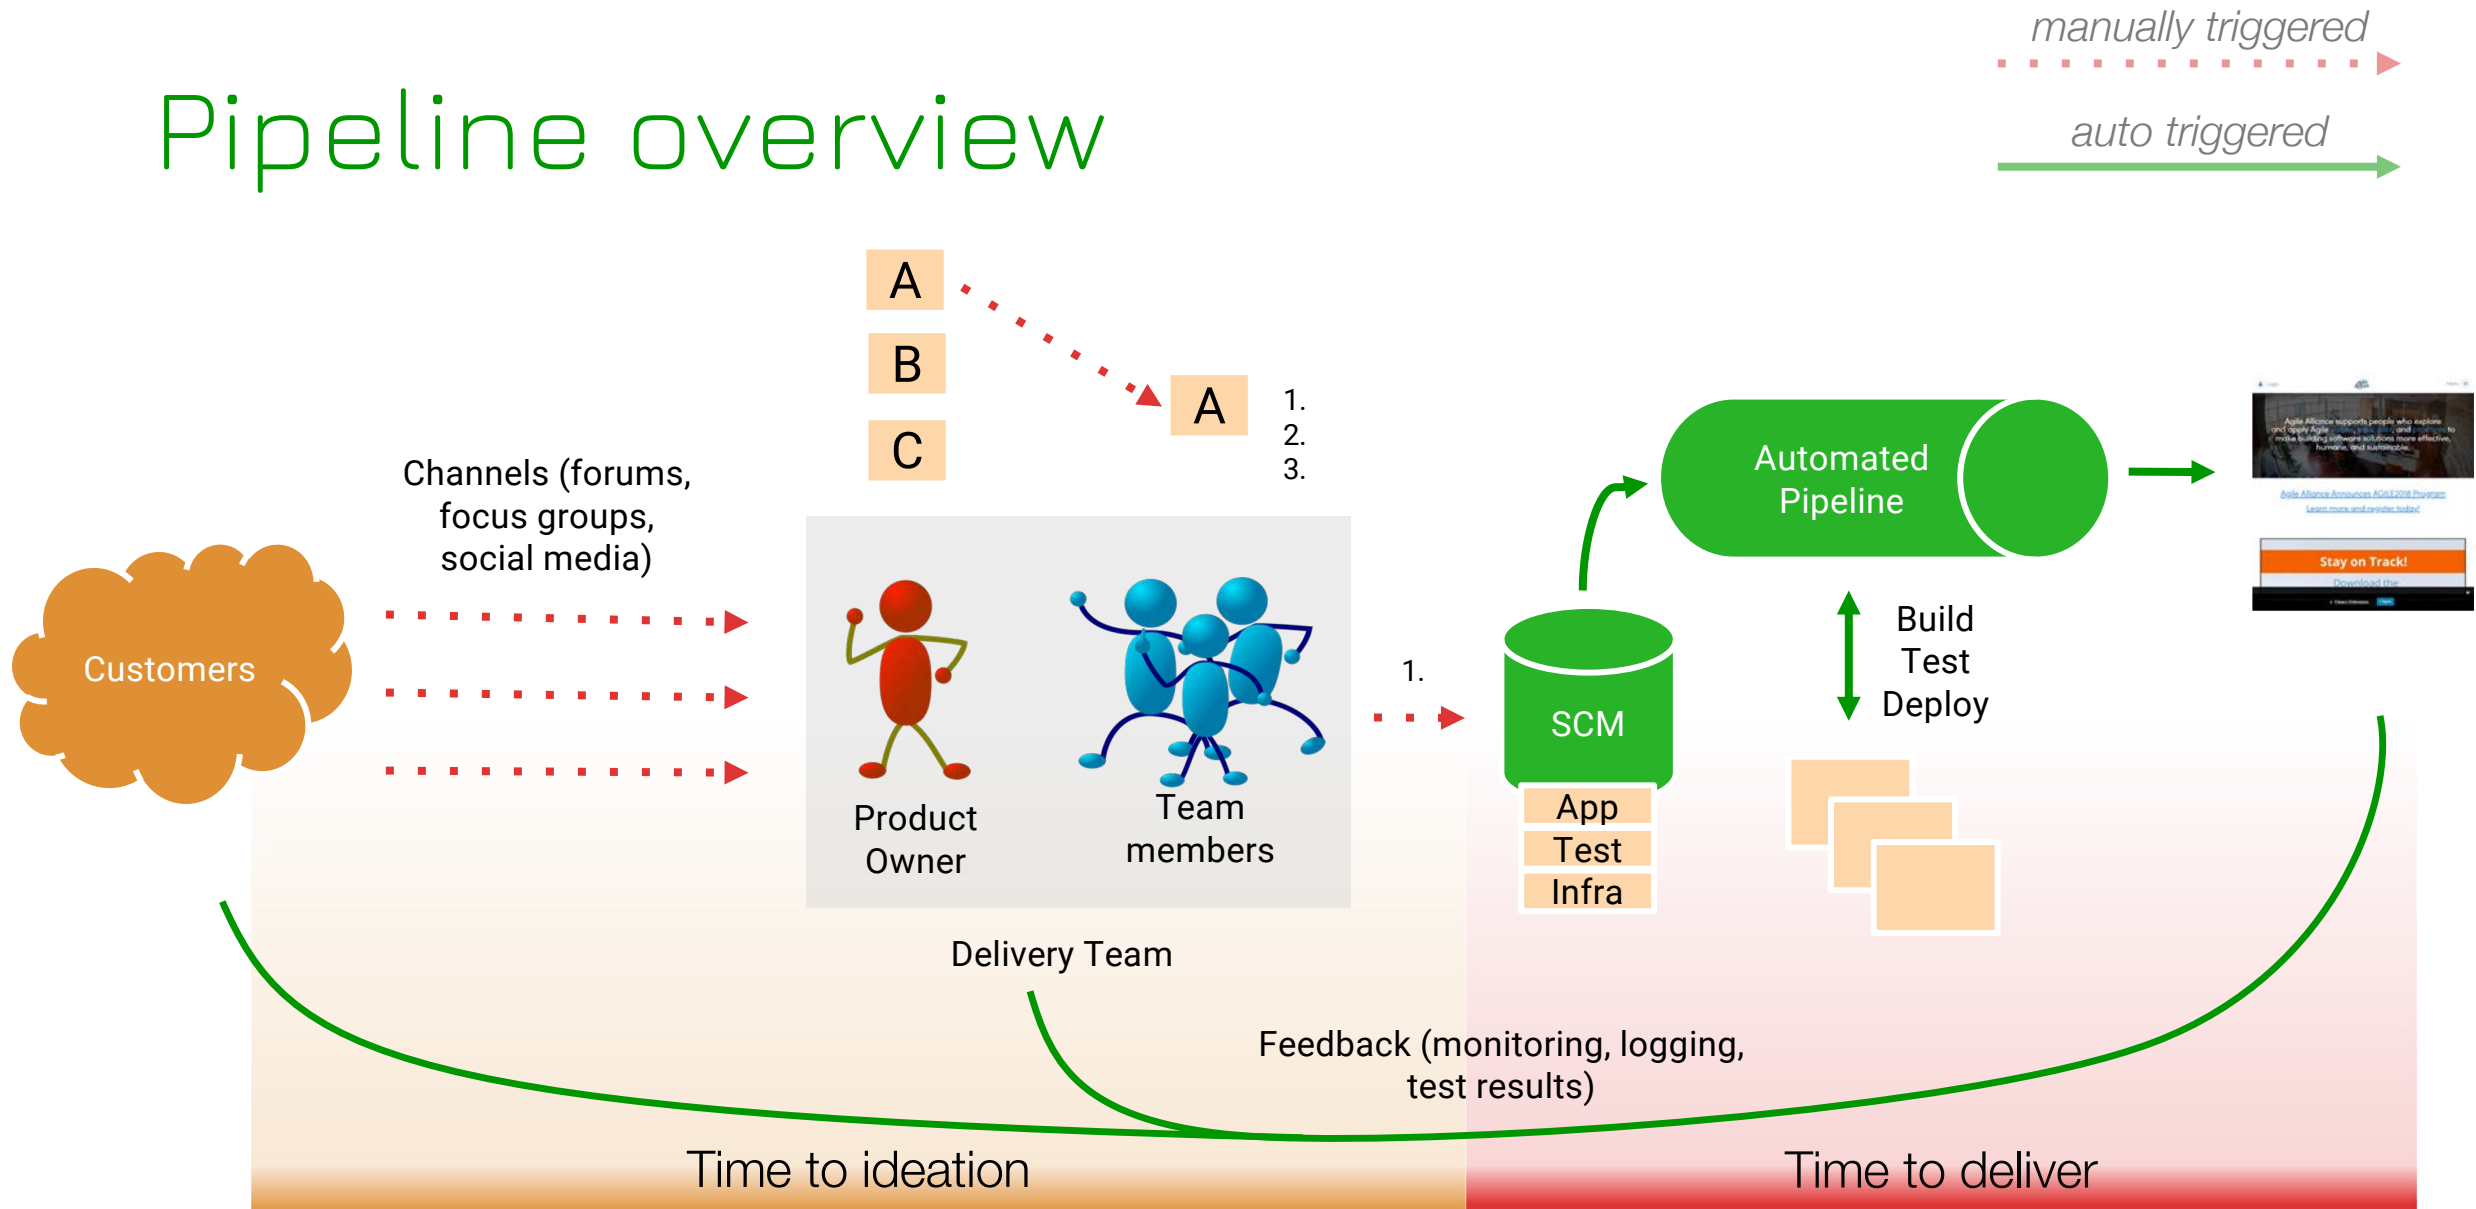

THE SECOND IDEAL: Focus, Flow, and Joy

THE THIRD IDEAL: Improvement of Daily Work

THE FOURTH IDEAL: Psychological Safety

THE FIFTH IDEAL: Customer Focus

# Pipeline overview

Introducing:

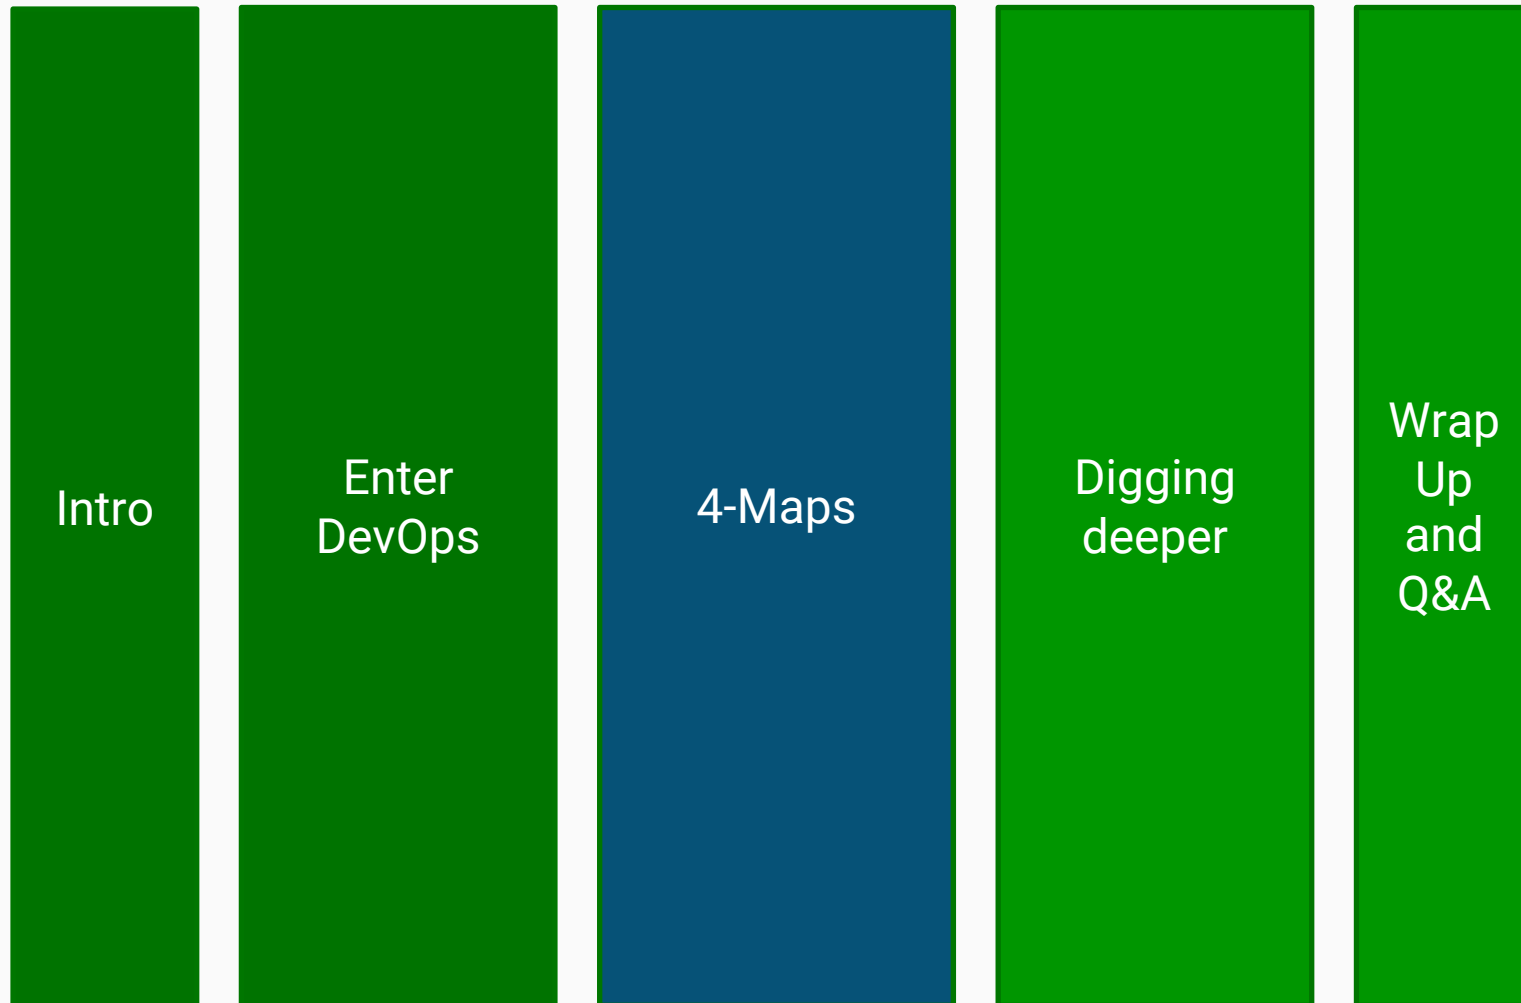

- New paradigms
- New ways of working
- New knowledge

All while meeting  
any obligations to  
existing  
commitments

# Talk map

# 3 Ways, 5 Ideals and... 4 Maps

## The Five Ideals

- THE FIRST IDEAL: Locality and Simplicity
- THE SECOND IDEAL: Focus, Flow, and Joy
- THE THIRD IDEAL: Improvement of Daily Work
- THE FOURTH IDEAL: Psychological Safety
- THE FIFTH IDEAL: Customer Focus

# The core of Flow Engineering is 4 Maps

The 4 Key Maps define direction, align stakeholder perspectives and guide decisions

**Outcome:** Define and clarify outcomes

**Value Stream:** Identify and address flow constraints

**Dependency:** Visualize and address external needs

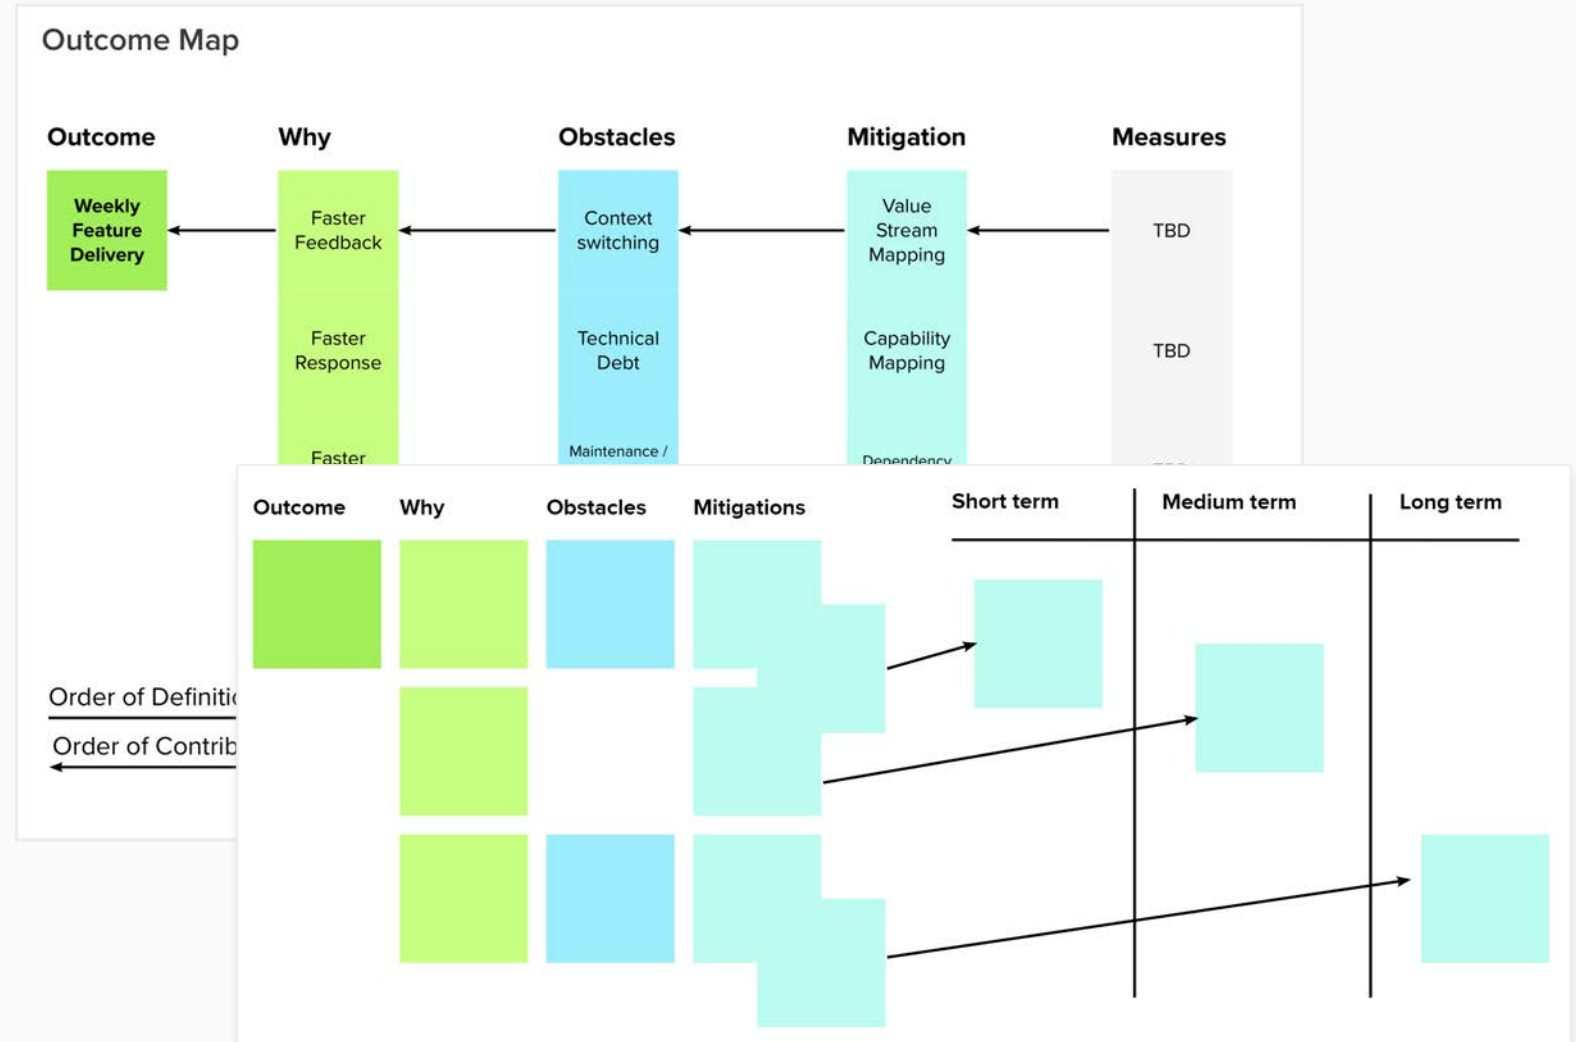

**Capability:** Measure and address internal needs

# Flow Engineering Starts With Outcomes

*“Begin with the end in mind”*

By first focusing on outcomes, we create clarity of vision.

By working as a team, we create alignment.

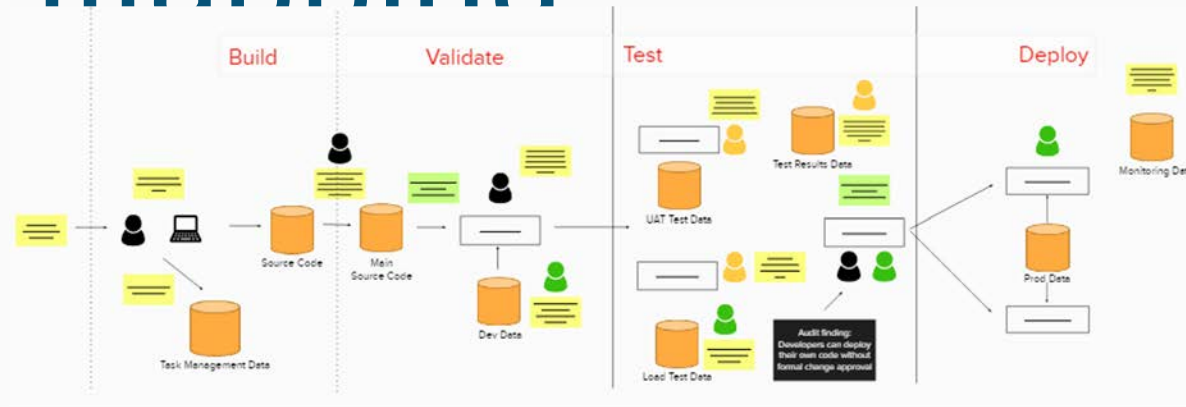

# Find friction with Value Stream Mapping

# Look outside with dependency

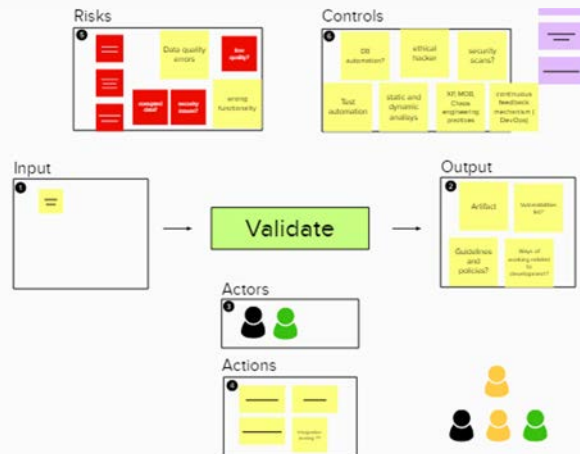

## mann

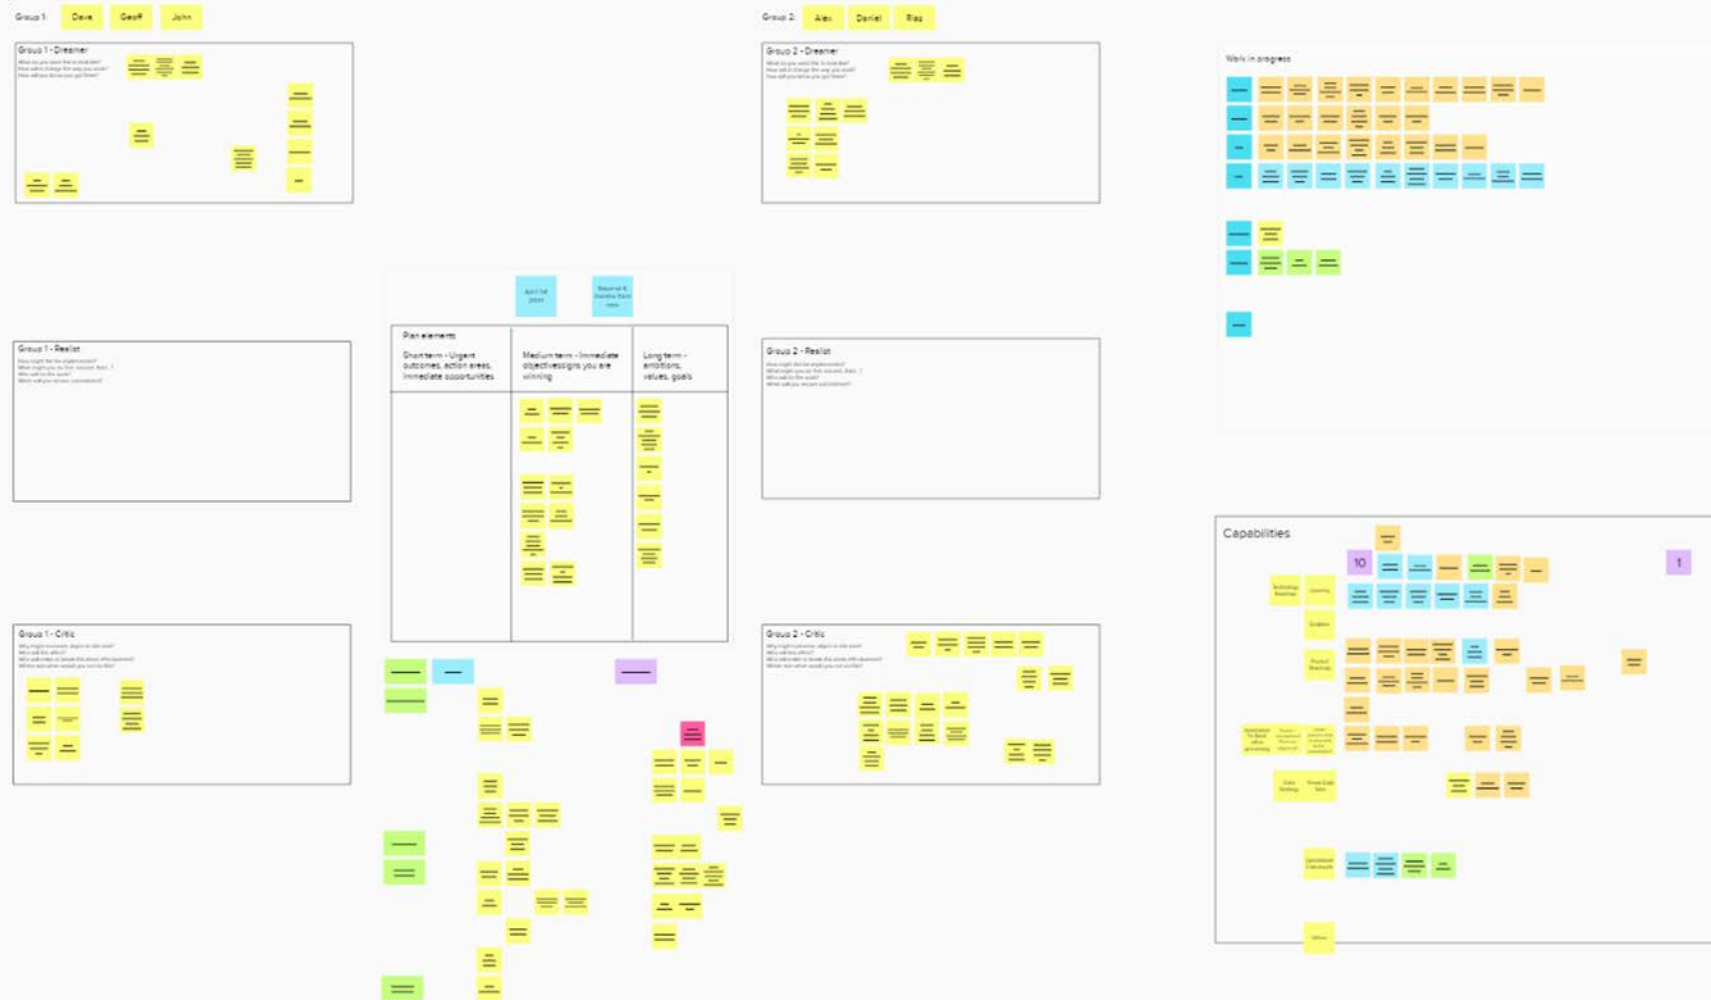

Who else influences our value stream?

What regulations and compliance do we need to ensure is built into our process?

How to we create and maintain a culture of safety as we scale?

# And looks into capability

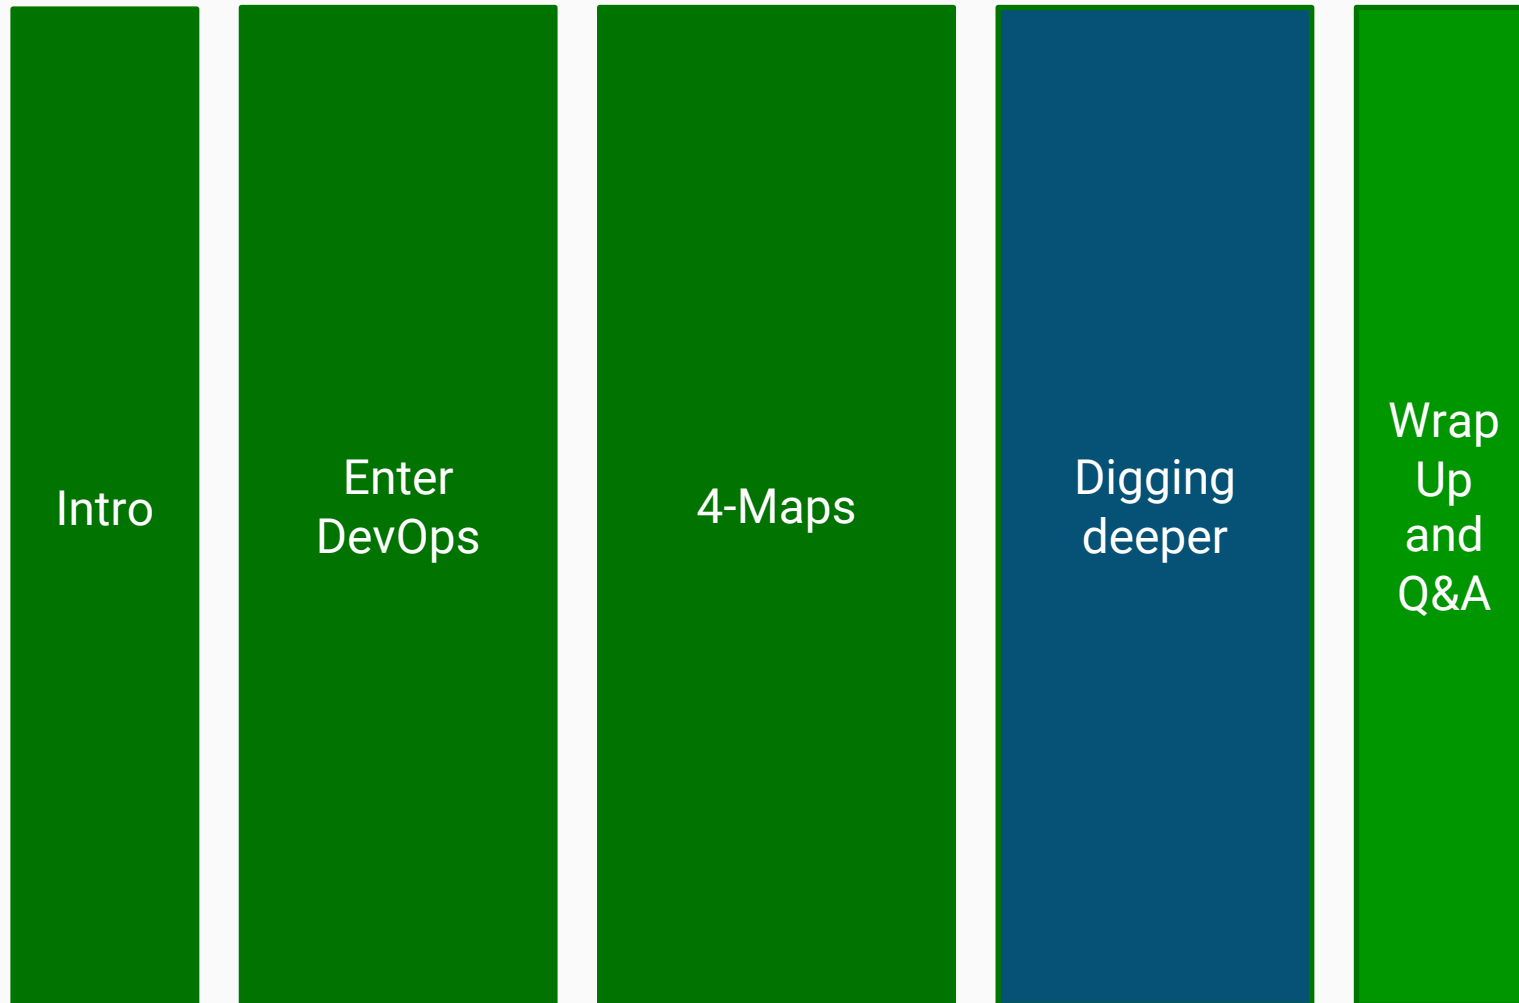

What do we have?

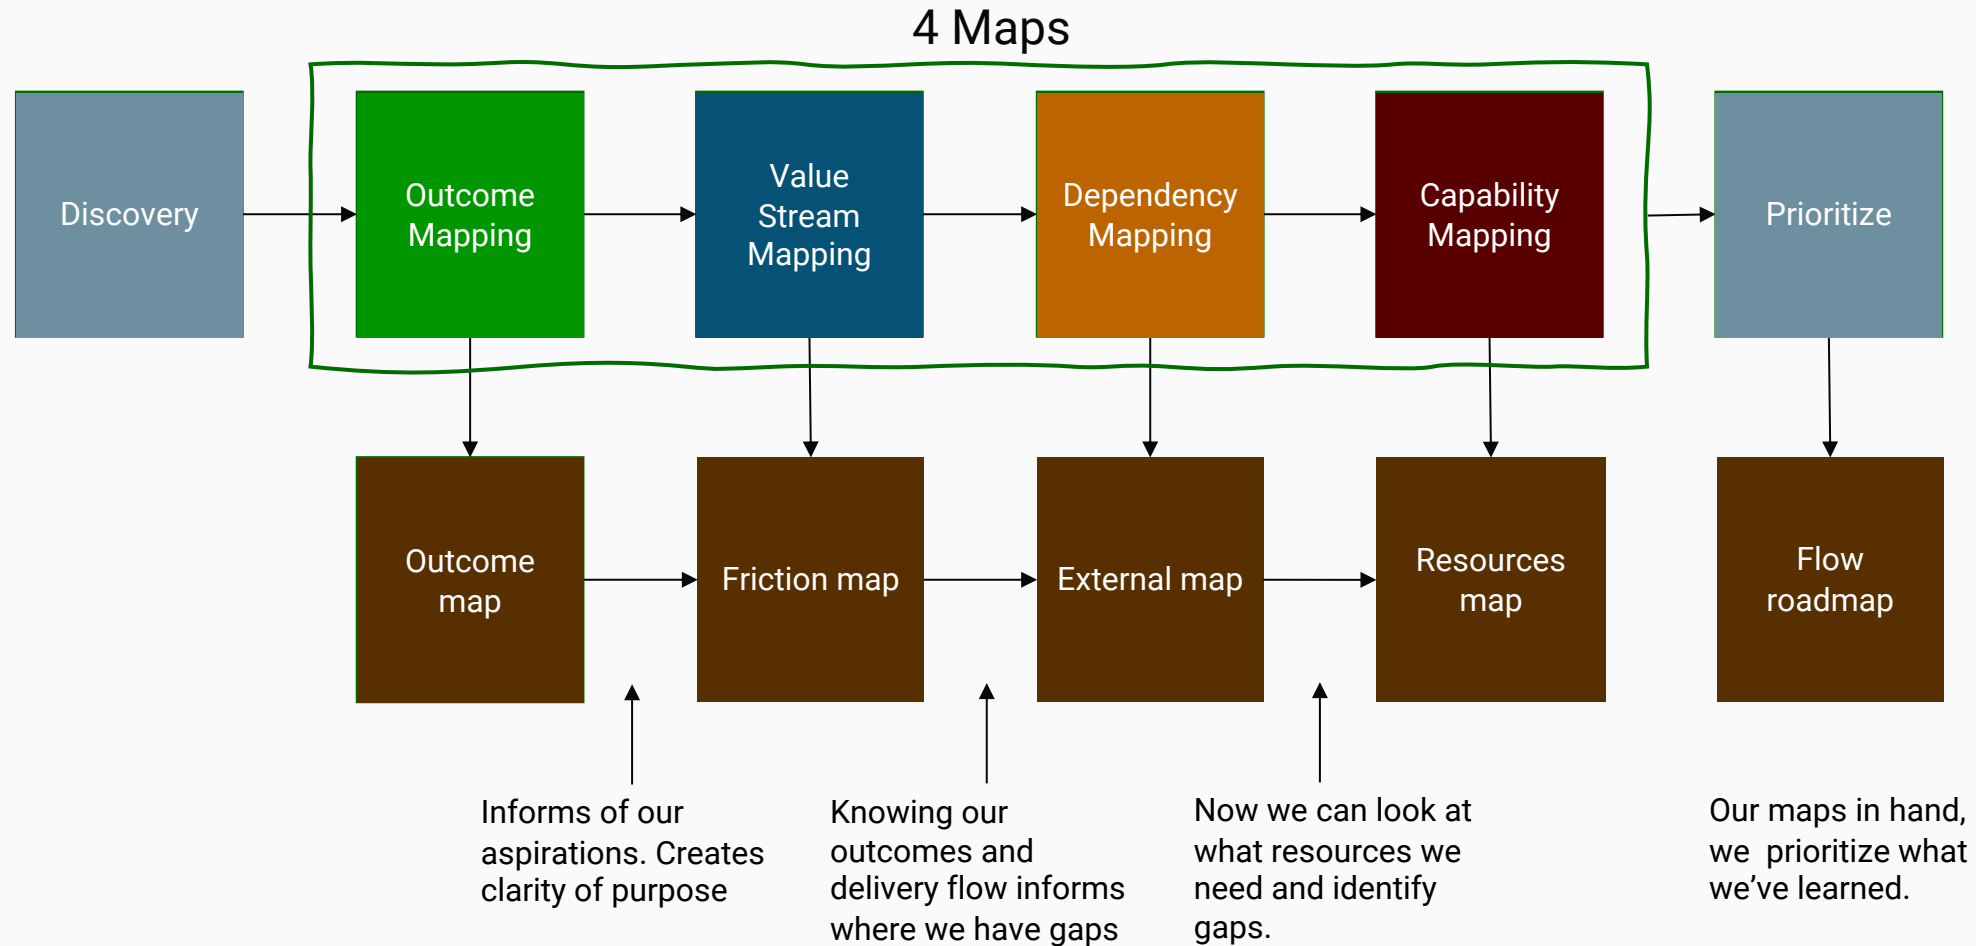

What are we missing?

What will prevent us reaching our goals?

# Talk map

# Order and context

# Example

## Outcomes

## Value Stream

## Dependencies

## Capabilities

## Immediate impact:

- Stopped trying to improve everywhere all at once
- Focus on biggest impact
- Halved environment creation and reduced initiation weeks to hours

# A word on scaling

## Flow Enablement Team

- Provide guidance on introduction of new practices
- Coaching development
- Flow Engineering

# Great, I'm convinced, now what?

# Talk map

# 4-Maps of DevOps

- Start with outcomes not solutions
- Plan for small, incremental changes
- The value is in the mapping not the map
